HIGH PERFORMANCE, ENERGY EFFICIENT HOME CONSTRUCTION

- Pre-engineered truss system
- R30 insulation batting in vaults or blown in flat ceiling areas
- Painted cementitious exterior finish
- 1/2" drywall
- Steel reinforced concrete block
- 3/4" rigid foam board insulation
- Pressure treated furring strip
- Painted wood baseboards & trim
- 3000 PSI fibercrete reinforced slab
- 6 mil vapor barrier
- Compacted fill
- Continuous ridge vent
- Reflective radiant barrier on roof sheathing for maximum sun and heat protection
- Metal anchor attached to each truss and embedded into steel reinforced 3000 PSI concrete
- Aluminum soffit and fascia system featuring rigid vents and flow thru soffits
- 3000 PSI concrete reinforced bond beam
- Precast "U" lintel above all windows and door openings, includes steel reinforcement bar
- Enhanced low-E insulated, double pane, single hung, argon gas filled, vinyl framed windows with screens
- Vertical steel reinforcements located per engineer on both sides of any opening, each vertical reinforcement is embedded into the concrete footer
- Sentricon Stations for Termite Protection
